gine and the dynamo.

The duration of life depends neither

climate nor food por race nor any external condition, but on the untura organs. One hundred years is the natural life of man, according to the Philadelphia Times. The curtailment be those errors and excesses in the manner of living which impair the organs and produce premature decay. From the me of Nosh to the days of Joshua and Moses the record is one of successive and gradual decrease la longevity Joshua waned old and stricken in years some time before his death at one hun dred and ten. The whole of life teems more or less its duration. In a manu facturing and commercial country par ticularly, where population is more crowded and where art and labor in its duration. Some particular, occupations abridge life by bodily confinement and deprivation of good air. When there is a free current of pure air the functions of the body and mind are kept in healthy action by moderate exreise, not by strained tension, and t hen the primalts in life are of a moral tendency and effect life may be prolonged to alway of years. But when we include in vicious habits, which reste unin and trouble. His obbs eway, often imperceptibly, and we do

un to seas. Changes in Pronunciation.

regres: "As brooks make rivers, rivers

Pronunciation is slowly but steadily langing. Sometimes it is going further and further away from the orthography; for example, either and neither are getting more and more to have in their first syllable the long i sound instead of the long e sound which they had once. Somethous it is being modihed to agree with the orthography; for xample, says a writer in Harper's Veelely, the older pronunciations of again to raytee with men, and of been to rhyme with pin, in which I was care fully trained as a boy, seem to me to be giving way before a propunciation in exact second with the spelling, again to thome with pain, and been to rhyme committee in charge of the national with seen. These two illustrations are
